

Chronic Care Management

cliexa® enables chronic disease patients to track their disease activity using intuitive graphics, clinically-validated scoring models and real-time data feeds to EMR systems.

Optimize Your Workflow

Custom Assessments

Enables modular platform to add any assessment anytime

EMR Integration

cliexaConnect Rules Engine provides HL7/ FHIR data feeds

Remote Monitoring

Patients can report symptoms real-time to EMR until their next visit

Quality Reports

Custom data feeds to your MIPS Quality Reports with EMR

cliexa's platform enables physicians and hospitals to fully **utilize patient-reported data** to **improve clinical care and outcomes**, while **maximizing reimbursement**. Now providers can seamlessly leverage **clinically validated scoring and assessment models** and incorporate **data into electronic medical records and billing systems**.

MAXIMIZE YOUR REIMBURSEMENT

cliexa's applications and platform are easily customized to address specific requirements of chronic care management and reimbursement, while also removing financial and IT-integration barriers. cliexa makes it easier to capture reimbursement for patient monitoring and increase reimbursement for calls and office visits.

NO IMPACT ON YOUR TEAMS

Our minimally invasive technology is easily implemented without interrupting workflow. cliexa® provides flexibility to connect in a range of care environments – from small physician practices to large hospital systems.

FAST AND EASY IMPLEMENTATION

cliexa's modular architecture easily integrates into enterprise-wide EMR systems with a customizable interface that can be configured based on IT specifications to accommodate specific care needs and billing requirements.

STREAMLINE YOUR CLINICAL PROCESSES

With patient-reported data at your fingertips, you and your staff can focus on higher-risk patients. cliexa's tools and platform easily integrate into your EMR, with a customizable interface that can be configured based on your preferences.

DISCRETE DATA, REAL-TIME

Whether you are a primary care physician or a specialty practice, you can leverage our tailor-made solutions for specific chronic patient populations, and generate revenues by enhancing current practices through documented, data-based decision making.

WE PROVIDE FULL SUPPORT

From screening to remote-patient monitoring, we support YOU through our implementation 100%. Whether you need customizations to the digital screening during patient visits or managing discrete data within EMR's, we are available always to remove all the barriers to increase your efficiency.

FREE, NO-RISK TRIALS

Take our HIPAA compliant solution for a drive and simply email patient data in preferred file formats to confirm data quality before going live. Let us customize the assessments to your needs during the trial period at no cost.

CONTACT US!

Please reach us at info@cliexa.com and we will get your trial platform up and running within days!
