

## Digital Forms

Quickly transform your intake process into fully reimbursable screening tools and feed your patient data to your quality reporting modules within your EMR.

# Optimize Your Workflow

with real-time, discrete data

### Custom Assessments

Enables modular platform to add any assessment anytime

### EMR Integration

cliexaConnect Rules Engine provides HL7/ FHIR data feeds

### Remote Monitoring

Patients can report symptoms real-time to providers' EMR

### Quality Reports

Custom data feeds to your MIPS Quality Reports within EMRs

## Remote Patient Monitoring

cliexa|ease

cliexa|ra

cliexa|sense

cliexa® remote monitoring platforms assist providers in making more informed decisions about treatment plans, and enable them to respond more quickly to new data so their patients will have fewer complications or side effects.

### Medication Adherence

Track your patients, send reminders, enable notifications

### Interactive UI/UX

Intuitive graphical interface creates superior mobile experience

### Self Reporting

Let your patients become self-advocates of their care

### Clinician Alerts

Custom data feeds to your MIPS Quality Reports with EMRs

## Value-Based Care

cliexa® suite of products enables providers to deliver value-based care which translates to significant cost savings.

cliexa uses multiple scoring models to provide clinicians multiple reference points with correlations to identify the accuracy of patient reported data which will result in better patient and clinician experience and enables more responsive and preventive treatment.
