

CASE STUDY

Resiliency Risk Screening for Adolescents

Location: UCHealth Pediatrics, Longmont, CO

Subspecialty: Adolescents' Mental Health

Number of Patients: 137

Pilot Period: 3 months

Collaborators:

UCHealth, Longmont, CO

"I think that as preventive medicine is being emphasized more and more, especially around sexual health, this is a great tool because we are asked to do all sorts of things during a physical exam, and this way you can do it quickly with more information."

Lisa Turner, MD, UCHealth Pediatrician

Participating physicians said:

cliexa influenced my counseling by.....

"making it easier to start the conversation."

"allowing the patient to feel more confident in truthful answers."

results

100% of clinicians reported that training and onboarding the platform was easy.

100% of clinicians would recommend cliexa to a colleague.
